VERSION 2. 11/08/2021

COD. ASPUERV**

TECHNICAL SPECIFICATIONS

Rectangular door to access the silo (1).
This door can be placed in silos from 4.60 to 16.80 with a maximum of 15 rings.

It is made up of 3 inner leaves and an outer one screwed onto a hinged frame. Both have a FOAM closing system (10x3mm) to guarantee their watertightness. The closing system has been improved with wing nuts that adjust the leaves to the frame.

The frame is welded to a corrugated sheet that is part of the silo cylinder.

It is easy to install and ships as an optional silo accessory.
