TECHNICAL SPECIFICATIONS

Roof sectors of pre-lacquered steel sheet on colours white and green.

Alternative option to zinc-magnesium.
Two colors: Pyrenean white and Navarra green.

It's utilised to reduce the visual impact or for aesthetic preferences.

USES: Resistance to corrosion, greater durability outdoors.

PARTS AND MATERIALS

- 1** ROOF SHEET
- Trapezoidal folded plate with waves on the edges to be assembled between them
 - Material: steel S280 GD Z225 GS 25/7 of polyester e= 0.8mm. The steel is galvanised (Z225) and later painted with EPOXI paint of 25µm outside and 7µm inside.
